

RUSSELL DUDEK

ENTERPRISE AI & MISSION TECHNOLOGY LEADER

Pittsburgh, Pennsylvania | 412.287.8640 | russelldudek@gmail.com | linkedin.com/in/russelldudek
<https://russelldudek.github.io/GeneralDynamics/>

EXECUTIVE PROFILE

Operator-technologist who makes complex work visible, connects technical and mission teams, and builds operating mechanisms that turn emerging technology into adopted, measurable outcomes. Brings direct experience in AI-assisted workflow design, high-reliability engineering, mission-scale operations, autonomous systems, data visibility, governance and cross-functional delivery.

ROLE-ALIGNED CAPABILITIES

Enterprise services strategy	AI/ML workflow design	Cloud modernization alignment
Data lineage & governance	Human-in-the-loop systems	Network/GIS concepts
Prototype-to-operation discipline	Executive briefings	Agile / Lean operating cadence

PROFESSIONAL EXPERIENCE

- Vape-Jet - Director of Operations

2025-Present

 - Lead AI-first operating transformation across production, purchasing, quality, customer success, support, engineering issue flow, ERP/Odoo, Jira, HubSpot, Slack, telemetry and AI-assisted workflows.
 - Connect factory, field, customer and machine-fleet signals into prioritized work, earlier risk detection, cleaner handoffs, dashboards, standard work, training and accountability.
 - Operate in a software-enabled robotics and machine-vision environment with approximately 1,000 fielded robots informing support and operating feedback loops.
- DudeWorth - Founder / AI and Automation Advisor

2017-Present

 - Develop AI-readiness and opportunity frameworks assessing value, feasibility, data readiness, governance, adoption burden, reuse and time-to-value.
 - Design agentic workflow patterns using structured context, retrieval, AI agents, human judgment, escalation, decision records, evaluation and governance rails.
 - Advise on AI-enabled operations, logistics technology, warehouse automation, AMRs, ASRS, cobots, transportation systems, network analysis and workflow design.
- Compunetics - Director of Operations and Engineering Management

2000-2013

 - Progressed through R&D program management, production management, strategic acquisition, operations management and director-level leadership.
 - Led engineering, manufacturing, quality, customer delivery and complex technical programs in advanced electronics and high-reliability environments.
 - Built quality systems, standard work, root-cause practices, performance measures and process controls.
 - Collaborated with high-consequence customers and partners including DoD, CERN, Intel and AMD; published industry articles, delivered technical talks and participated in the HyperTransport Consortium.
- Amazon - Operations Management / Site Leader

2014-2018

 - Led launch and execution for Amazon Prime Pittsburgh in a 24/7 customer-backward environment supporting approximately five million second-day orders annually.
 - Built leadership routines, labor planning, throughput visibility, escalation paths, standard work and operating mechanisms.
 - Applied Lean and Gemba practices across safety, quality, throughput, customer experience and team engagement; contributed to Prime Air research and Amazon Flex geolocation concepts.

PROFESSIONAL EXPERIENCE, CONTINUED

ZeusVu - Chief Pilot, Autonomous Systems and Aerial Data Operations

2018-2022

- Led regulated drone operations across medical, energy, logistics, real-estate and restricted-airspace contexts with a 100% safety record and no FAA incidents.
- Developed TensorFlow-based concepts for automated aerial inventory and computer-vision-enabled field intelligence.
- Designed medical drone delivery and chain-of-custody concepts connecting technology, risk, stakeholders and governed execution.

Cardinal Building Products - Regional Director

2021-2023

- Built the company's first remote regional operation and modernized distributed CRM, commercial, fulfillment, logistics, digital marketing and online-buying workflows.
- Advanced AI-enhanced transportation-management and route-planning concepts.

ADDITIONAL LEADERSHIP & TECHNICAL COMMUNITY

Enviro Social Capital - Chairman of the Board

2014-2017

- Co-founded and led a public-private impact initiative focused on sustainable infrastructure, green finance and civic transformation.
- Helped shape and evaluate a \$200 million Social Impact Bond feasibility concept for Pittsburgh sewage and green-infrastructure improvement.

IEEE - CMPT and EDS Pittsburgh Chapter Chair

2012-2016

- Led regional technology programming connecting industry, academia, STEM outreach, electronics, manufacturing and emerging technology.
- Organized conferences, seminars, business tours and technical programming.

EDUCATION & CREDENTIALS

University of Pittsburgh - Bachelor of Science

Academic grounding in materials science, physical chemistry and biology-related studies.

- Google AI Essentials
- IBM Enterprise Design Thinking Practitioner
- Six Sigma Certification
- OSHA 10

TECHNICAL TOOLKIT

Agentic AI | LLM workflows | RAG patterns | human-in-the-loop design | Python | SQL | JavaScript | TensorFlow | Tableau | ERP/Odoo | Jira | Confluence | HubSpot | Slack | GIS and mapping workflows

LEADERSHIP THROUGH-LINE

Decision systems, operating cadence, coaching, accountability, cross-functional execution and direct work inside the problem - not title-only leadership.

MISSION TRANSFERABILITY TO GDIT / CBP

OPERATING ENVIRONMENT

- 24/7 customer-critical, high-reliability and regulated operating contexts.
- Direct experience turning ambiguous technical work into standard work, escalation paths and decision cadence.
- Federal adjacency through DoD-related collaboration; direct CBP OIT tenure is not claimed.

TECHNICAL-TO-OPERATIONAL BRIDGE

- AI readiness, agentic workflows, evaluation, governance, human review and feedback-loop design.
- GIS, geolocation, computer vision, mapping and network-analysis concepts tied to real operating questions.
- Executive briefings, backlog governance, training and ownership transfer that make capability sustainable.

ROLE-SPECIFIC OPERATING THESIS

Synchronize enterprise service delivery to cloud migration wave gates so mission value, data lineage, explainability, human authority and operational ownership are verified before a capability is released to analysts.
